

NBC Meshtec (Thailand), NBC Meshtec's Thai subsidiary, to expand molded filter factory

NBC Meshtec Inc. (President: Tetsuya Kaji), a Nisshin Seifun Group company, has made the decision to build a second factory next to the site of the existing factory operated by NBC Meshtec (Thailand) Co., Ltd., a Thai subsidiary, in order to meet increasing demand for filters in Thailand's growing automobile industry.

In recent years, many major automakers have established operations in Thailand, and it is anticipated that the production of engine vehicles, including hybrid vehicles (HVs), will be concentrated in Thailand and in the wider ASEAN region.

Further, the production of electric vehicles (EVs) is expected to increase in the future.

Under these circumstances, we have decided to build a second factory in Thailand in response to the anticipated increase in demand for filters.

Construction of the second factory will expand our production capacity in response to the growing domestic demand in Thailand. Moreover, we aim to further expand the second factory to make it a global supply base in the future.

Details

(Overview of the company and the second factory)
